

Reporting and Billing Instructions for the Young Adult “Catch-up” FREE Vaccine Initiative

The target group for Initiative is **ages 19 through 26** and **uninsured** or **underinsured** (health insurance plans that do not cover the “vaccine” or health insurance plans that your agency does not participate with, put “N” for health insurance on Patient Encounter entry).

To report the vaccines for Uninsured or Underinsured (see definition above) patients:

- Report the vaccine CPT code with “FR”
- Report male HPV with a “FR” (*male HPV is currently not a covered service by Preventive Medicaid, therefore, those male clients receiving HPV services thru this Initiative will be considered underinsured and may be charged for administration of the vaccine. However, Passport does pay for male HPV, see Passport instructions below*)
- Charging for Vaccine Administration
 - Report 90471 administration CPT code and let the system assign amount charged to the patient, which will slide on income; or
 - You may request from AFM Division a different administration rate and, with approval, may override*;
- Not Charging for Vaccine Administration
 - You may request from AFM Division a “0” charge and, with approval*, report 90471FR.
 - **REMEMBER: if you provide the administration service FREE** to the uninsured or underinsured patients, **you cannot bill Medicaid.**

To report the vaccines for Preventive Medicaid:

- Vaccines in the Initiative will be reported with the vaccine CPT code with the “FB” modifier **and** the vaccine administration code. *Preventive Medicaid pays the administration rate off the vaccine CPT code.*

Vaccine	Description
90632FB	Hep A
90636FB	Hep A/B
90746FB	Hep B
90649FB	HPV
90734FB	MCV-4 Meningococcal
90715FB	TDaP
90716FB	Varicella

To report the vaccines for Passport:

- For **MCV4-meningococcal (90734)** and **Varicella (90716)** vaccines given as part of the Initiative that Passport **ONLY** pays vaccine administration. You may provide these vaccines to Passport recipients and report the Vaccine CPT code (*without a modifier*) **and** administration CPT code through encounter entry. *Passport pays the administration rate off the vaccine CPT code.*
- We are **not recommending** that the Hep A (90632), Hep A/B (90636), Hep B (90746), HPV (90649), or TDaP (90715) be provided to Passport recipients because Passport pays for those adult vaccines. (*The system is not currently set up to allow for appropriate charging of those vaccines to Passport.*)

*Request to override charges should be submitted through the Local Health Help-Desk at:
LocalHealth.HelpDesk@ky.gov
